## Summary

---

First-year college student currently at the University of Washington, Bothell. Experience with java, c++, c#, and visual basics. Experience with CS classes since freshman year of Highschool. Hard working student looking for an internship in tech companies to get experience in the tech industry. Currently pursuing a Bachelors in Computer science and Software engineering

## Work experience

---

### Teacher Assistant

Apr 2017 - Jul 2017

UCIC - Private Elementary School

Prepared various types of classroom materials to support teacher plans. Monitored students in class and hallways to supervise, enforce rules and support lead teacher. Collaborated with the teacher to devise and implement developmentally appropriate lessons. Assisted teachers with lesson planning and curriculum implementation with skills such as planning and leadership.

### Teacher Assistant

Apr 2016 - Jun 2017

Community church of Seattle

Taught kids around the ages of 7-14. Taught students basics coding such as loops and if statements through Scratch, an online program that has drag and drop programming that was created by MIT. Organized and distributed learning materials like homework, textbooks and classroom supplies. Assisted teachers with instruction and provided clerical support for diverse needs.

## Education

---

University of Washington, Bothell

2018 - 2022

Currently attending the University of Washington, Bothell to get into the Computer Science and Software Engineering department.
